Parking Permits

Transform parking control across your community

Discover seamless control over parking access with our advanced Parking Permits module. Designed to streamline the entire lifecycle of parking permits, this module empowers efficient management and renewal while offering real-time permit verification for a hassle-free parking experience.

- **Instant parking permit lookup:** Access real-time permit information swiftly, providing immediate verification to enhance parking control and management.

- **Automated eligibility criteria calculations:** Utilise automated calculations to determine eligibility criteria, simplifying the process of permit approval based on predefined rules.

- **Inclusive permit types:** Support various permit types, including electronic permits and printed permits, catering to a diverse range of parking needs.

- **Residential and staff area management:** Effectively manage both residential and staff parking areas, ensuring optimised allocation and utilisation of parking spaces.

- **Inspections and car spot management:** Facilitate inspections of permit areas, including efficient car spot management, to maintain compliance and enhance parking space utilisation.
